Solutions for charging infrastructure

SPIE presents at EVS30 Exhibition

Stuttgart, September 29th, 2017 – SPIE will present its charging infrastructure solutions at the world's largest trade fair and congress event for e-mobility, the Electric Vehicle Symposium & Exhibition (EVS30), from 9 to 11 October. International researchers, government officials and industry experts use the forum to discuss the current status of electric mobility. The location alternates between North America, Asia and Europe; Stuttgart was chosen for the 30th event.

As the independent European leader in multi-technical services, SPIE provides its customers with tailored system solutions in the growing electric mobility market. Markus Holzke, managing director of SPIE Deutschland & Zentraleuropa, declares: "As an innovative company, we are not only following the path of developing the future of e-mobility, but actively shaping it. We will show the international audience of trade professionals in Stuttgart our comprehensive technical expertise."

Everything from a single source

With a broad expertise in finding the right solutions and a dense network of locations, SPIE offers a range of e-mobility services including the following:

- Network revamp, network connection of charging infrastructure
- Planning and installation of charging infrastructure (AC and DC charging systems)
- Programming of standard and individual controls
- Process and system integration
- Service and maintenance
- Network load management and control

Individual comprehensive packages for customers

In Germany alone, SPIE has now installed more than 3,000 charging points for numerous customers. The Group recently entered into a partnership with the manufacturer Siemens. The aim of the cooperation is to provide comprehensive packages that meet all individual requirements – from consulting and installing to the operation of electric vehicle charging stations, regardless of the back-end system used. Further partnerships are planned in order to develop the best possible solutions for

existing and new customers. Another advantage for customers is the local proximity: more than 14,500 employees are working for SPIE Deutschland & Zentraleuropa at over 200 locations every day.

At EVS30, SPIE Deutschland & Zentraleuropa will present its e-mobility services at the shared Germany stand 1A33 in Hall 1.

About SPIE Deutschland & Zentraleuropa

SPIE Deutschland & Zentraleuropa, a subsidiary of the SPIE group, the European independent leader in multi-technical services in the areas of energy and communications, is the leading multi-technical service provider for buildings, facilities and infrastructure in Germany, Austria, Poland, Czech Republic, Slovakia and Hungary. Its service range encompasses technical facility management, energy-efficiency solutions, technical services for the transmission and distribution of energy and for industrial clients as well as in the areas of mechanics, electrical and security technology, HVAC technology and information and communications technology.

With 38,000 employees working from close to 600 sites in 38 countries, SPIE achieved in 2016 consolidated revenues of €5.1 billion and consolidated EBITA of €352 million.

SPIE Deutschland & Zentraleuropa has more than 14,500 employees in over 200 locations.
